

Netval and its role in exploiting research results in Italy

(Based on published Netval Data and on the Netval Annual Report 2009)

Kharkov, Ukraine 8 September 2011

Mission

- ✓ **Netval** borns in 2002 as an Italian Universities Network, with the aim to create a common strategy for the exploitation of the universities research. In 2007 became an association set up under the law of Italy.
- ✓ **Netval** has the function of “interface” between Universities and Ministries, local administrations, industrial associations and industries, venture capitalists and financial bodies (promotion of university research)
- ✓ **Some Netval goals:**
 - to front critical issues (reduction of public funding for research activities and several changes in the Italian regulations regarding patent ownership)
 - protect and exploit research results (education, dissemination, patenting, licensing)
 - improve the link between universities and industries (networking, managing research and know how contract tools)
 - generate new products and companies from academia (spin-off, infrastructures, money)

Main goals

- ✓ to encourage and support the exchange of best practices, procedures, tools and contract models useful for the technology transfer
- ✓ to link the academia with the industry by mean of the technology transfer processes
- ✓ to organize training sessions, seminars and workshops to raise awareness on IPR tools and TT best practices
- ✓ to connect the Italian portfolio of patents and spin-offs at European level
